Bi-weekly Log of GenAI interactions

Student: Dhanush Kumar Ramesh

Project: ML-based surrogate model for Signal Integrity

All significant interactions with GenAI must be logged. ***You will be required to upload a file to LOOP containing the entirety of your GenAI interactions every two weeks.*** This log in conjunction with the upload will allow you to summarize your interactions according to the TOPIC format recommended in the Guidelines for the Use of GenAI in Masters Projects. If you have no interactions, please write none in the appropriate section.

GenAI Interaction Week 4-5	
Tool *Name and model and date used*	Google Gemini – 16/02/2026
Output, Prompts, and Iterations *Provide a copy of the outputs you generated from the tool(s) you used, exactly as they were provided by those tools. Please provide a link or details of the file uploaded to Loop*	I used it to generate illustration images and also a block diagram for my peer review presentation. Link: https://gemini.google.com/share/23ca14abce95
Critical Analysis *Please briefly describe the benefits and shortcomings of the interaction and how you have incorporated it into your project*	The images were generated to show the audience with visually appealing images and block diagrams.
Tool *Name and model and date used*	Google Gemini – 18/02/2026
Output, Prompts, and Iterations *Provide a copy of the outputs you generated from the tool(s) you used, exactly as they were provided by those tools. Please provide a link or details of the file uploaded to Loop*	https://gemini.google.com/share/ef930f76abd8
Critical Analysis *Please briefly describe the benefits and shortcomings of the interaction and how you have incorporated it into your project*	I cross verified the grammar and also to check the technical terms if they were used accurately with context to avoid any misleading understanding. Also to improve the flow of the script.
