

Bi-weekly Log of GenAI interactions

Student: Dhanush Kumar Ramesh

Project: ML-based surrogate model for Signal Integrity

All significant interactions with GenAI must be logged. **You will be required to upload a file to LOOP containing the entirety of your GenAI interactions every two weeks.** This log in conjunction with the upload will allow you to summarize your interactions according to the [TOPIC](#) format recommended in the Guidelines for the Use of GenAI in Masters Projects. If you have no interactions, please write none in the appropriate section.

GenAI Interaction Week 1-2	
Tool Name and model and date used	
Output, Prompts, and Iterations <i>Provide a copy of the outputs you generated from the tool(s) you used, exactly as they were provided by those tools. Please provide a link or details of the file uploaded to Loop</i>	None
Critical Analysis <i>Please briefly describe the benefits and shortcomings of the interaction and how you have incorporated it into your project</i>	None

I haven't used GenAI yet. I was just doing regular exploration of papers and trying to know the methods used. I was exploring basic libraries which was available through lot of git repo and google search but not through GenAI.
